Developing Online Components That Drive Results!

HTML5 | CSS3 | JAVASCRIPT | REACT | PHP | GITHUB | STYED COMPONENTS | FLEX-BOX | GRID | GATSBYJS

Objective

Seeking an opportunity to join a creative agency within the online development industry. I aim to exceed expectations and fluidly complete online challenges in this challenging era of web development. I love creating digital identities that gives users a unique and pleasant experience. By paying close attention to growing development trends and practices I have gained strong problem solving skills that will lead to success.

Recent Projects

Event Newsletter.   *HTML, CSS ANIMATION, JAVASCRIPT, PHP, AND mailgun api.*

- Visually appealing newsletter with a functioning form. Receive a custom styled email after signing up. light

Hoolie Search Engine.   *HTML, CSS, JAVASCRIPT, PHP, PDO AND SQL.*

- Hoolie Search Engine! Challenging project that had me working more with php and sql. Developed web crawlers to search and store data so I can create a search engine similar to google.

BrickHousePizza.   *HTML, CSS, React Hooks, Styled Components.*

- Restaurant ordering site built with React Hooks and Styled Components. In this project you are able to create, read, update and delete various components within the ordering menu all while the program calculates your order total plus tax rate.
